GO biological-process enrichment
Measured network genes with BP annotation; BH across both lineage/module/term test families
cytoplasmic translation
translation at synapse
translation at postsynapse
proton transmembrane transport
chemical synaptic transmission
anterograde trans-synaptic signaling
tissue development
cell junction organization
nervous system development
monoatomic ion transport
metal ion transport
monoatomic cation transmembrane transport
trans-synaptic signaling
generation of neurons
animal organ development
neuron differentiation
purine ribonucleoside triphosphate biosynthetic process
purine nucleoside triphosphate biosynthetic process
RNA splicing
circulatory system development
anatomical structure morphogenesis
synapse organization
sensory perception
nervous system process
mRNA metabolic process
protein folding
synaptic signaling
cell-cell signaling
postsynapse organization
G protein-coupled receptor signaling pathway
cell junction assembly
regulation of dendrite development
positive regulation of cell projection organization
